

SUNGROW Logger1000 / Logger3000
Sensor Settings for Si-RS485...-MB / Tm-RS485-MB / Ta-ext-RS485-MB

1. Make sure that your SUNGROW Logger1000 / Logger3000 is updated to the latest Firmware Version. Otherwise not all sensor profiles might be available in the device list.
2. Follow the instructions of the SUNGROW document “Meteo Station and Sensor Commissioning Guide”
3. Selected the installed sensor types from the device list.
For all sensors Si-RS485... for sensor firmware version 1.53 or higher select the device type “Si-V53”.
For the temperature sensors Tm-RS485-MB or Ta-ext-RS485-MB select a suitable device type.
